

From Australia

While on holidays in Queensland with my family I bought a Statesman and the color is Vespa Blue. The dealer told me to treat the paint with a product called Glare sold by a company called Infinity and you wont regret it and you will remember my words. So I got the car back to Melbourne and I looked you up on the Net and I ordered your products. The car was polished by the dealer but nothing to what it looks like now. It's like glass and everybody asks me what polish I have used to get this shine and I give them all your website and so far 3 have bought your products, but my car is a testimony that your polish is the best thing that I have used and I will always use it. It is so easy to wash and it SHINES.

Thanks for a fantastic product.
